### **CCLCA Candidate Questionnaire**

1. What is your position on defined benefits retirement plans for public employees and do you support eliminating or modifying these retirement systems? If so, how and why?

---

---

2. Do you support the death penalty and do you believe that a mandatory death sentence for the murder of a peace officer is appropriate?

---

---

3. The ACLU and allied organizations believe that the Peace Officer Bill of Rights creates impediments to holding law enforcement officers accountable. Law enforcement officers assert that all public employees deserve due process during administrative investigations and that the Peace Officer's Bill of Rights does not impair the ability of managers to hold officers accountable for their actions. What is your position on the Peace Officer Bill of Rights? Do you believe changes need to be made?

---

---

4. Lawmakers have recently taken actions to require public disclosure of allegations of misconduct within peace officers' personnel records. As law enforcement leaders, we are conforming to these changes in law and will not seek to protect bad actors within our profession. Law enforcement believes that current law provides expansive access to records of misconduct. The ACLU believes that law enforcement does not have a right to privacy concerning personnel records. Will you support changes to law that require disclosure of more information than what is already required by law?

5. The ACLU has convinced a fringe group of lawmakers to propose a ban on the utilization of facial recognition technology in cameras operated by law enforcement. The ACLU is fearmongering, creating perceptions that law enforcement is seeking to create massive secret databases for purposes of surveilling the public 24 hours a day, seven days a week. Law enforcement does not have the funding, tools, or human resources to conduct mass surveillance. Law enforcement has approached lawmakers asking them to consider common sense regulations to prevent abuses, prohibit the use of facial technologies that are inaccurate, and only allow facial recognition software to be used in very limited circumstances prescribed by law. Do you support banning the use of facial recognition software in all application or would you support the framework for regulation offered by law enforcement?

6. Do you support or oppose civilian police review boards and/or police oversight commissions?

---

---

7. What is your position on privatization of public safety (court, detention, custodial, correction, police officer)?

---

---

8. What do you believe are the three most important issues facing law enforcement today?

---

---

9. What do you believe are the three most important issues facing California today?

---

---

10. There has been significant debate concerning body-worn cameras and whether officers should be able to utilize body-worn cameras prior writing their police reports. Law enforcement has long maintained that use-of-force encounters are usually fast-paced,

fluid, and traumatic experiences that significantly impact the ability of officers to recollect the details of the event. The ACLU has argued that reviewing body-worn camera footage prior to writing reports aids officers write the report according to the video footage, instead of according to what they perceived to have happened. What is your position on body worn cameras for peace officers?

---

---

11. Have you sought the endorsement of the ACLU?

---

---

12. Do you believe that laws need to be changed to make it easier to convict peace officers of crimes?

---

---

13. Criminal justice reform advocates have sponsored legislation to reduce California's prison population by sending inmates to county jails, which are already overcrowded, reductions in sentencing, and the early release of inmates. Law enforcement has argued that many of these inmates have not meaningfully participated in evidence-based rehabilitation programs, suffer from poor mental health care, and have received little formal assistance transitioning back into society. Consequently, law enforcement officers are encountering an increasing number of homeless individuals and pervasive drug use among the homeless population. Law enforcement leaders believe that rehabilitation services, mental health care, and transitional support should be provided instead of criminal justice reform proposals. Will you support policies similar to Proposition 47, Proposition 57, and Assembly Bill 109 that indiscriminately decriminalize and release inmates from incarceration more quickly?

---

---

14. Why do you believe law enforcement should support you as a candidate for public office? Describe past actions taken in support of public safety.
